Government Polytechnic, Washim

UDAAN

2023-24

From the Principal's Desk...

Government Polytechnic, Washim, established in 1982, is an old government institution which has a legacy of 41 years. Today, GP Washim offers Diploma education in 6 branches, namely Civil Engineering, Mechanical Engineering, Electrical Engineering, Automobile Engineering, Electronics and Telecommunication Engineering and Information Technology with an intake capacity of 60 each.

The institute focuses on interaction with best institutes in the state in terms of academic exchange programs, internships, industry-academic meets. Several industry institute partnership programs such as soft skill training, competitions, internships, industrial visits, industrial expert lectures, signing MOU's with different industries etc. to make students aware of industry environments. Along with this, dedicated Entrepreneurship Development Cell has been setup to increase the awareness among students regarding self employment. Under this Cell we consistently organize Entrepreneurship Awareness Camps.

The college has established a full fledged Training and Placement Department, to encompass various activities from shaping the students to meet the stringent requirements of the industry, and to make them suitable to excel in the highly competitive business world. The main objective of T & P cell is to motivate and guide students to explore the domains of various career opportunities, entrepreneurship and enhance functional skills by providing industrial training, industry associated projects, aptitude skills, GD & PI skills. The Placement Cell is dedicated to identify probable employers and conduct campus interviews. In addition to this our Mechanical Engg & Civil Engg courses have secured NBA Accreditation.

We highly value our association with recruiters, alumni and remain committed to making their recruiting experience productive and positive. I invite the recruiting organization and our students to find the best match between their need and capabilities.

Things are not that old, 8 years ago I admitted to G.P.W. and being a D.M.E, student I was very excited to learn about machines and engines but when the actual course started the picture was completely different than imagination. Mathematical theorems, design and theory of machines, strength of materials and similar topics created fear in my mind. A certain thought started coming into my mind that I am not an engineering material. I was in confusion whether to continue or not. I realized that 'engineering' is not going to be that easy. I decided to communicate this to my teachers. I was an average academic student although a fearless personality was being developed inside the reason for that was professors and staff was personally attentive to students. This thing helped me a lot. A good rapport started building with all. Parallel to academics, industrial visits, extracurricular activities were being conducted in the department. I got opportunity to go 'Stage'. The best memories which are impossible to forget are about G.P.W Cultural function. We used to participate in each and every event, performed well and made memories for lifetime. It was an overwhelming moment when I, along with my team got the 'Best Actor', 'Best Director' and 'Best Drama' Award for that year. People and surroundings at G.P.W campus have given a positive energy, Knowledge and confidence on which I could do a lot in life.

Success Stories

Born in a remote village where there were no telephone, also when the heavy rains come in rainy season, no contact was there with neighbour villages. I at the age of 15 completed my matriculation with

flying colors. By the great discussion, my parents and relatives decided to take admission in GPW in Civil Branch. Being from a Marathi medium school in first year I was so feared about the subjects which was taught in English. But my teachers helped me so nicely that helped me to overcome my fear. After that I never looked back. After my Diploma I got admission in B.E. in Akola where I stood First in college and stood Fourth in University which made my parents and grandparents happy. Then afterward went to Pune for earnings. But due to parents demand and financial situations I came back and started work in Washim. Firstly joined a company as a Engineer where I worked for more than 15 years. In 2010 I started a convent school called THE WORLD SCHOOL which is now CBSE affiliated and a renowned school in Washim. Then in 2012 started our New Firm VEWA Infratech company pvt. Ltd. The company is specialized in Road construction, bridge construction, Government buildings etc. The company now owned a Hot Mix Plant and RMC Plant. I always pay gratitude to my GPW family who helped me for my overall development when I was in college.

Today as a alumni of GPW I always stand up for students who are from GPW and specially from poor family for their overall development and give them training for securing their future.

Success Stories

I belonged to a below par family and met with a hard, unprivileged childhood. Hence the motto of my work life was to gain optimum knowledge with maximum practicality and on field experience. I enrolled myself in G.P.W. civil branch in a hope to build a better life for my future clients and my family, and fortunately, this institution satisfied all these aspects. Personally, this course was very knowledgeable which involved a lot of thinking in finding solutions. Along with studying, I worked for the Nagar Parishad to help them in dimensioning the existing local houses as and also as an P.W.D. engineer for three years. This was very fruitful in terms of practical knowledge. After graduating, I started a firm that began with private residence clients and today has expanded to huge townships and multi-faceted commercial buildings in Washim, Karanja, Malegaon, Nagpur, Ayodhya and more. This journey from a G.P.W. student to an engineer and, as of today, to a successful builder, was all thanks to the theoretical and practical knowledge provided in the course and a hunger to keep progressing in my work. In 2018, I was felicitated with the prestigious Vishwakarma Award by the hands of honorable C.M. of Maharashtra, and in 2020 I was honoured as the Icon of Vidarbha by Times of India. I would like to say for the younger generations that never limit yourself to the background you belong to or the education you take. With determination and hardwork, you can reach the heights that you have never ever imagined and, when you do, stay grateful and humble to your roots.

Pappa's dreams "papa kahate hai bada naam karenge beta hamara Engineer kakam karenge" that's why after 10th my steps moved towards engineer and I got admitted in GPW. Being a DME students I was very excited to learn about machine & mechanism. But when actual study started picture was very different from my imagination. I feared from engineering subjects so I discussed it with teachers and they behaved very cooperatively. I was an average Marathi medium student, but afterwards my fearless personality developed and I participated in all other activities like dance, drama, skeet etc. After that I did not moved backward. I completed my graduation in mechanical engineering but it wasn't the end, my real hard work started at that time because my energy, my real god my father had passed away. I just entered in industrial city Pune with no money but real source of money, my engineering education & teachers were with me. So joined my first job at Ganage pressing as new product development engineer. I had covered major part of industrial knowledge with my job, because my dream was to make my own company. But without money & experience I wasn't able to achieved my goal so I started to save money from my salary. I uswed to walk daily for about 15 kms to my job location with one time rice & one-time vadapav as my meals. After that I joined NTB hi-tech ceramic. Then I decided to start a ceramic industry. But there were no funds other than my own my salary. Then I searched for scrap market, collected parts of machinery & designed all machines on my own. Which are working till now in my factory. Today i have started industrial ceramic production, ceramic electrode insulator, ceramic molding seal etc. I am 4th manufacturer in industrial ceramic in India but goal is still not achieved because I wanted to shift my company in my native place washim for local employment, this was also my father's dream. So I shifted my company in Washim MIDC in feb-2018 & created employment for local people. Today also I look forward for development in terms of increase in production for expansion of my factory, GM India ceramics.

Students' Feedback

am Ratnadeep Dahiphale (Branch : EE, Batch 2022-23), Placed in Schneider Electric Firstly I would like to express my heartfelt appreciation for the remarkable efforts and outstanding support provided by the College Training and Placement Cell throughout my academic journey. From the moment I enrolled in this esteemed institution, I have been consistently impressed by the unwavering dedication and commitment of the Training and Placement Cell in shaping the futures of students like me.

The Cell's unwavering commitment to ensuring successful job placements for every student is truly commendable. The team has tirelessly organized placement drives, campus interviews, and recruitment fairs, providing us with a platform to showcase our skills and talents to leading companies. Their proactive approach, coupled with their industry tie-ups, has resulted in a high rate of successful placements, creating a sense of confidence and security among the student community. Moreover it has played a vital role in establishing and nurturing connections with various industries and organizations. The regular industry interactions, guest lectures, and networking events have provided us with unparalleled opportunities to interact with industry professionals, gain insights into real-world scenarios, and build a strong professional network. These connections have proved to be instrumental in securing internships and job placements.

Lastly, I would like to express my deepest gratitude to the entire team at the Training and Placement Cell and especially Mr.S.D.Solanke and Mr.U.R.Toshniwal for their unwavering dedication, passion, and commitment to our success. Their tireless efforts have undoubtedly enhanced our overall learning experience and equipped us with the necessary skills to thrive in the professional world.

I am Rahul Pande. (Branch – Mechanical Engineering 2022-23)
Placed in Schneider Electric, Ahmednagar.

Transitioning from the classroom to the office offers a unique opportunity for personal and professional growth and I got this precious opportunity due to TPO cell of my college. I am extremely satisfied with the college's placement services. Thanks to their efforts,

I was able to secure a well-paying job even before graduating. The guidance provided by the placement team was invaluable, and I highly recommend it to all students. They offered one-on-one counseling sessions and organized various recruitment drives, making the process smooth and hassle-free. I cannot thank them enough for all their support. Their dedication, perseverance, and industry knowledge helped me land a job at a reputable firm, and I am excited to see where this opportunity takes me. I highly recommend this college's placement services to anyone looking to kickstart their professional journey. The college's placement services were definitely a highlight of my academic experience. The team was well-connected with top companies in the industry, and their personalized approach helped me identify my strengths and weaknesses, resulting in multiple job offers. I feel confident and grateful to have been part of such a supportive community."

Lastly, A biggest Thank you to Training and placement officer Mr. Umesh Toshniwal sir and Mr. S. D. Solanke sir for their exceptional guidance and support during my placement process. Your commitment and dedication to helping us secure internships and job opportunities are truly commendable, and we could not have achieved our goals without you. Thank you for being a mentor and guide to all of us, and for sharing your expertise and wisdom with us. Your exceptional work has left an indelible impact on us, and we are grateful for all that you have done for us.

I am truly honored and excited to have been selected to be a part of these renowned companies. First and foremost, I would like to extend my heartfelt thanks to you, TPO (Training and Placement Office) at Government Polytechnic, Washim. for your unwavering support and guidance throughout the selection process. Your expertise and encouragement have played a significant role in shaping my professional journey. Your confidence in me has been instrumental in securing these remarkable opportunities, and I am sincerely grateful for your trust. Thank you for everything, D. K. Bawane Sir, the HOD of the Automobile Engineering Department, Washim. Your mentorship has been invaluable, and I am truly fortunate to have had the opportunity to learn from you. I will strive to make the most of this opportunity and contribute to the success of GE Aviation and John Deere.
